SUMMARY

Passionate and experienced Web Software Engineer who values clear communication, great design and creating pixel-perfect, high-performance web interactions.

EXPERIENCE

Staff Software Engineer @ Varo Bank

January 2020 - Present

- Currently helping rewrite the Varo Bank app from scratch in React Native with Expo and TypeScript.
- Previously worked across multiple projects and teams including: client banking, growth, engagement, internal tools and on our new design system.
- Active member of the hiring committee, with a focus on mentoring and onboarding incoming Engineers.
- Initially joined as a Senior Frontend Engineer and promoted to Staff Engineer in March 2024.
- Some Technologies I am working with: TypeScript, React, React Native, GraphQL/Apollo, Storybook, and React Testing Library.

Sr. Frontend Developer @ Overstock.com

October 2019 - December 2019

- Fixed bugs and built features on the Product Page in Node.js, Express, Webpack, Redux, and React.
- Rebuilt the Webpack Server-side Rendering portion of our NodeJS powered app.
- This was my brief second stint at Overstock.

Sr. Full-Stack Developer @ tZERO

September 2018 - October 2019

- Built the next generation Blockchain-based UI using React, Redux, Webpack, Express, Node.js, and PostgreSQL.
- Filled in for multiple temporary Dev Lead stints.

Frontend Developer @ Overstock.com

October 2014 - September 2018

Product Page Dev Team:

- Handled new feature implementation, A/B Tests, and bug squishing on product pages.
- Worked on a full-stack Node.js, Express, React, Redux mobile web app as well as various client-side repo's.
- Was involved in the design process of product with UX and Product teammates.
- Built tools for our front-end workflow, such as implementing ES6 support and ReactJS into our repo.
- Created reusable React components and NPM modules that are used by teams across Overstock.com.
- During this time I was promoted to Senior Frontend Developer.

Production Web Team:

- Worked directly with Marketing, Product, and Back-end teams on various projects concerning the homepage of Overstock.com.
- Handle initial front-end development, support and maintenance for Overstock.com micro-sites, homepage content, and promotional email/content/pages. Take part in QA and on-call when needed.

Freelance Developer and Designer @ Damir Hara Design

March 2013 - ∞

- Helped companies/clients build websites and web apps from scratch or by jumping in the middle of the project. I've worked on everything from simple one-page static websites to production React apps served to millions of people.

Clients worked with: Infowrap.com, Cottonwood Electric, TheChapelMotorcycleShop.com.

SKILLS

JavaScript React React Native Redux TypeScript GraphQL (Apollo) REST APIs React Testing Library
Webpack Astro Expo Next.js Node.js CSS Styled Components PostCSS SASS CSS Modules
Responsive Web Design Semantic HTML Git & CLI chops Troubleshooting Wireframing & Prototyping
Cross-browser compatibility Communication & Liaison Web Accessibility Mentoring & Advising
