## SUMMARY

I love many aspects of technology and the web. I consider myself to be a technologist (developer/engineer) with a keen eye for detail and design. I love making intuitive web-based client interactions that look great and function properly across many browsers and devices. I care about performance as much as I do about design, usability, and up-and-coming technologies. My code is always pixel-perfect.

## SKILLS

- Semantic HTML
- CSS

PostCSS  
LESS  
SASS  
CSS Modules  
Styled Components

- JavaScript

React  
Redux  
TypeScript  
GraphQL  
RESTful API's  
Webpack  
Node.js  
Express  
GatsbyJS

- Git & CLI chops
- Troubleshooting
- Responsive Web Design
- Wireframing & Prototyping
- Cross-browser compatibility
- Communication & Liaison

## EXPERIENCE

### **Sr. Frontend Engineer @ Varo Bank**

January 2020 - Present

- Building the first digital banking platform using TypeScript, React, Apollo, and GraphQL.

### **Sr. Frontend Developer @ Overstock.com**

October 2019 - December 2019

- Built the Product Page in Node.js, Express, Webpack, Redux, and React.
- Rebuilt the Webpack Server-side Rendering portion of our NodeJS powered app before seeking a new opportunity.

### **Sr. Frontend Developer @ tZERO**

September 2018 - October 2019

- Built the next generation Blockchain-based UI using React, Redux, Webpack, Express, and Node.js.
- Filled in for multiple temporary Dev Lead roles.

### **Frontend Developer - Product Page Dev @ Overstock.com**

October 2015 - September 2018

Product Page Dev Team:

- Handled new feature implementation, A/B Tests, and bug squishing on product pages.
- Worked on a full-stack Node.js, Express, React, Redux mobile web app as well as various client-side repo's.
- Was involved in the design process of product with UX and Product teammates.
- Built tools for our Front-end workflow. Such as implementing ES6 support and ReactJS into our repo.
- Created reusable React components and NPM modules that are used by teams across Overstock.com.
- During this time I was promoted to Senior Frontend Developer.

**Previous Teams:** ShopEx Dev, Production Marketing Dev.

### **Front End Developer - Production @ Overstock.com**

October 2014 - October 2015

Production Web Team:

- Worked directly with Marketing, Product, and Back-end teams on various projects concerning the homepage of Overstock.com.
- Handle initial front-end development, support and maintenance for Overstock.com microsities, homepage content, and promotional email/content/pages. Take part in QA and on-call when needed.

### **Freelance Developer and Designer @ Damir Hara Design**

March 2013 - Present

<https://www.damirthe.dev>

- Help companies/clients build websites and web apps from scratch or by jumping in the middle of the project. I've worked on everything from simple one-page static websites to full web apps.

**Clients worked with:** Infowrap.com, Cottonwood Electric, TheChapelMotorcycleShop.com.

## EDUCATION

### **University of Utah**

Class of 2014

BS, Mass Communication
