SUMMARY

My code is always pixel-perfect: As a technologist/developer/engineer with a keen eye for detail and design, I love making intuitive web-based client interactions that look as great as they function (no matter what browser or device). With site speed and user engagement as key factors in today's tech landscape, I prioritize performance alongside design, usability, and up-and-coming technologies.

SKILLS

- Semantic HTML
- CSS

```
PostCSS
LESS
SASS
CSS Modules
Styled Components
```

- JavaScript

```
React
Redux
TypeScript
GraphQL
RESTful API's
Webpack
Node.js
Express
GatsbyJS
```

- Git & CLI chops
- Troubleshooting
- Responsive Web Design
- Wireframing & Prototyping
- Cross-browser compatibility
- Communication & Liaison

EXPERIENCE

Sr. Frontend Engineer @ Varo Bank

January 2020 - Present

- Work on implementing the UX using TypeScript, React, Redux and GraphQL/Apollo.
- Helped develop and launch the new bank.varomoney.com.
- Participated in a mentorship program in collaboration with Hackbright Academy.
- Part of a hiring committee and helped mentor new Engineers.
- Worked across multiple projects and teams including: client banking, internal tools and most recently working on our new Design System.

Sr. Frontend Developer @ Overstock.com

October 2019 - December 2019

- Built the Product Page in Node.js, Express, Webpack, Redux, and React.
- Rebuilt the Webpack Server-side Rendering portion of our NodeJS powered app.

Sr. Frontend/Full-Stack Developer @ tZERO

September 2018 - October 2019

- Built the next generation Blockchain-based UI using React, Redux, Webpack, Express, and Node.js.
- Filled in for multiple temporary Dev Lead roles.

Frontend Developer @ Overstock.com

October 2014 - September 2018

Product Page Dev Team:

- Handled new feature implementation, A/B Tests, and bug squishing on product pages.
- Worked on a full-stack Node.js, Express, React, Redux mobile web app as well as various client-side repo's.
- Was involved in the design process of product with UX and Product teammates.
- Built tools for our front-end workflow, such as implementing ES6 support and ReactJS into our repo.
- Created reusable React components and NPM modules that are used by teams across Overstock.com.
- During this time I was promoted to Senior Frontend Developer.

Production Web Team:

- Worked directly with Marketing, Product, and Back-end teams on various projects concerning the homepage of Overstock.com.
- Handle initial front-end development, support and maintenance for Overstock.com microsites, homepage content, and promotional email/content/pages. Take part in QA and on-call when needed.

Freelance Developer and Designer @ Damir Hara Design

March 2013 - Present

<https://www.damirthe.dev>

- Help companies/clients build websites and web apps from scratch or by jumping in the middle of the project. I've worked on everything from simple one-page static websites to full web apps.

Clients worked with: Infowrap.com, Cottonwood Electric, TheChapelMotorcycleShop.com.

EDUCATION

University of Utah

Class of 2014

BS, Mass Communication
